Challenges

Backlog of Work

Arterials \$35,000,000

Local Access \$42,000,000

Declining Revenue Sources

Gas Tax is declining

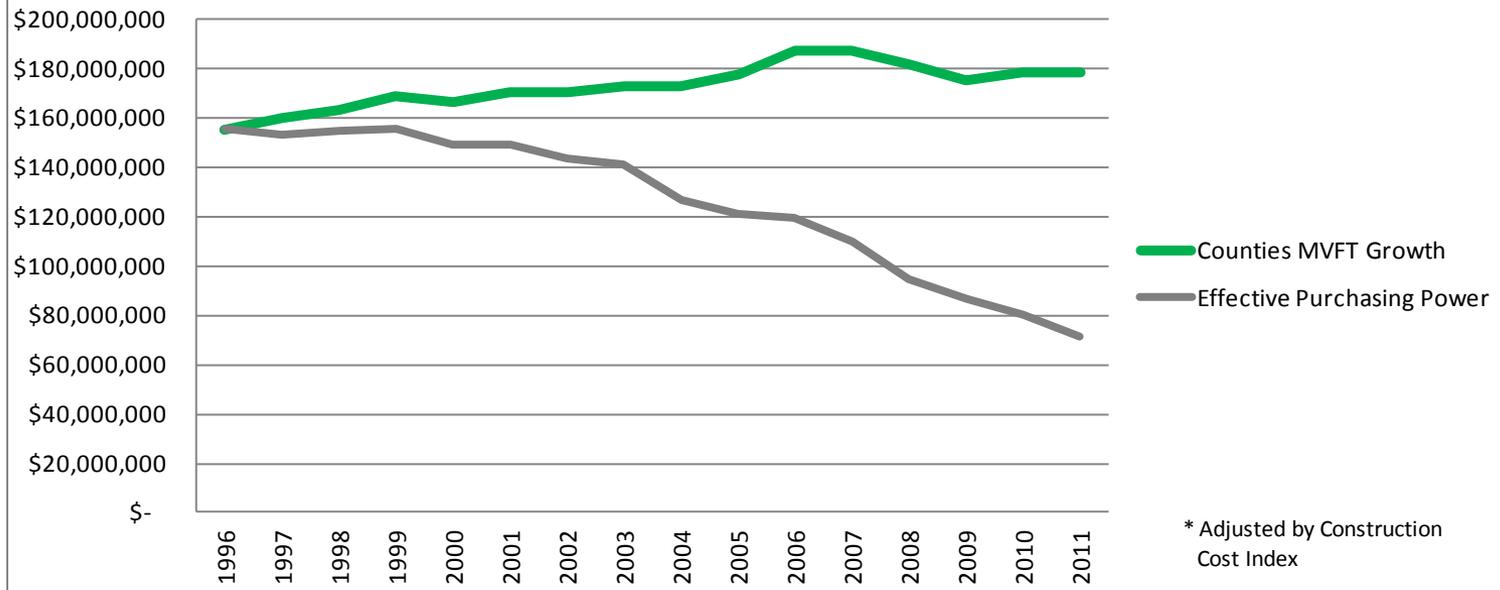

Property Tax is declining

Economy

Annexations (generally high value properties)

Inflation

County Gas Tax Distribution Effective Purchasing Power *

County Challenges

- Scope of the work
 - Washington Counties construct, operate, maintain and preserve 48% of the centerline miles of roadway in the State.
- Fewer funding sources are available for rural roadways.
 - TIB is urban only
 - Federal programs are weighted toward urban routes (historically 11% rural in this region)
- Incorporations and Annexations target the highest value properties at the lowest infrastructure liability.

SUCCESSSES!

- Bridge program
 - Replaced Bruce Road Bridge and Cheney Plaza Bridge last year.
 - On track to keep this pace for next year, with the goal of zero bridge load restrictions.
- Maintenance and Operations
 - Improved 218 miles of truck routes last year.
 - New lean programs in place to improve operational efficiency.
- Road Preservation and Improvement
 - Completed Argonne/Bruce preservation
 - Completed Farwell Road improvement project
 - Completed County Homes stormwater improvement (phase 1)
 - Constructing Palouse Hwy preservation project
 - Constructing Inland Road improvement project
 - Construction Wellesley Ave. sidewalks
 - Design on 11 other preservation/improvement projects
